

ADITYA SHINDE

Generative AI Engineer | LLMs & RAG | AI Agents | Deep Learning | Python | Azure AI
Pune, India | +91 8830821456 | adityashindepvt0@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Generative AI Engineer with 2+ years of hands-on experience delivering production of Generative AI, Deep Learning and NLP systems on Azure and AWS. Shipped a multimodal RAG platform processing 90,000+ pages/day, a live agentic corporate travel product serving real users, a QLoRA fine-tuned medical LLM, and CNN-based computer-vision models deployed to field use. Strong Python, SQL and FastAPI microservice skills across TensorFlow, Keras, PyTorch and Hugging Face, with hands-on Docker, vector and graph databases, and rigorous LLM evaluation.

TECHNICAL SKILLS

Languages & Data: Python, SQL, CUDA / GPU-accelerated training, FastAPI, REST APIs, microservices, Git

Deep Learning & ML: TensorFlow, Keras, PyTorch, Hugging Face Transformers, Transformer architecture, CNNs, YOLOv9 object detection, computer vision, OCR, NLP, PEFT / QLoRA fine-tuning; working knowledge of GANs and Diffusion models

Generative AI: RAG architectures, agentic workflows, LangChain, LangGraph, LlamaIndex, AutoGen, Google ADK, Model Context Protocol (MCP), Agent-to-Agent (A2A) protocol, prompt engineering, embeddings, vector search, LangSmith evaluation & tracing, LLMOps

LLMs: OpenAI GPT-4.1 / GPT-3.5, Azure , Anthropic Claude, Google Gemini & MedGemma, Llama 3, Mistral, AWS Bedrock

Cloud & Databases: Azure AI Foundry, Azure OpenAI, Azure AI Search, Cosmos DB, AKS, Azure Functions, Blob Storage, Azure DevOps; AWS S3, Lambda, ECS, EKS; Neo4j & graph DBs, vector DBs, Docker, Kubernetes, Terraform, CI/CD

AI-Native Development: GitHub Copilot, Claude Code, Codex, MCP-integrated dev workflows, automated code security scanning and review

PROFESSIONAL EXPERIENCE

AI Engineer — Aress Software and Technology Limited, Pune.

Aug 2024 – Present

Multimodal RAG Platform for Engineering Drawings

- Built a production RAG system enabling engineers to search thousands of technical drawings and machine/floor diagrams (with revisions) in plain language and jump directly to the matching page.
- Trained a custom YOLOv9 object-detection model to identify engineering symbols, combined with Azure Document Intelligence and LLM-based cleanup to extract structured data from every page.
- Scaled the pipeline to 90,000+ pages per day while keeping retrieval latency low.

Booked.ai — Agentic Corporate Travel Planner (Live in Production)

- Built an agentic corporate travel planner using LangChain Deep Agents to automate the multi-step process of planning and booking corporate travel end-to-end.
- Engineered a custom execution harness for long-running agent tasks, maintaining state and context stability across extended multi-step sessions.
- Integrated 23 MCP tools connecting the agent to flights, hotels and travel-policy data, collapsing a fragmented booking process into a single conversational flow and reducing manual effort by ~95%.

AI Hail Damage Detection

- Built a phone-based computer-vision tool using TensorFlow / Keras that estimates hail-dent depth from a single photo, removing the need for specialized inspection hardware.
- Cut manual inspection effort by ~60% and per-claim cost by ~35% by automating the damage-assessment step.

Medical-Domain LLM Fine-Tuning

- Fine-tuned Google's MedGemma 4B with QLoRA on a medical QA dataset, improving answer correctness from 78% to 91% and reducing hallucination rate from 8.5% to 5.8%.
- Built a held-out evaluation set and benchmarked the fine-tuned model against the base model in LangSmith on correctness, faithfulness and hallucination rate, using the results to gate the production rollout.

EDUCATION

B.E. Computer Engineering — Savitribai Phule Pune University (SPPU), 2020 – 2024

CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate (AI-102) — [Verify](#)
- Anthropic Certified: Claude with the Anthropic API — [Verify](#)
- Anthropic Certified: Claude Code in Action — [Verify](#)
